...Quality windows needn’t cost the earth

Sustainability with performance & style

The Infinity System from VEKA offers the technology and style that all VEKA systems are renowned for with all the sustainable benefits of recycled content.

Performance, aesthetics and the reassurance of the VEKA brand, the most specified in the world.

The VEKA Infinity System – Quality windows needn’t cost the earth.

Many have already made the switch to the Infinity suite of recycled profiles:

In 2010, VEKA unveilled plans for the UK’s first major installation of windows made with recycled PVC-U. The groundbreaking contract with Places for People involved the installation of thousands of windows, with Infinity profiles containing up to 80% recycled polymer sourced from VEKA’s Unique recycling group.

2011 saw Luton Borough Council switch entirely to recycled PVC-U for all future window replacements. Luton is thought to be the first UK borough to commitment to recycled windows in this way and will begin ordering frames made of the innovative VEKA Infinity system immediately.

The Infinity Window System from VEKA

Profiles with up to 80% recycled content
All the performance and aesthetics of virgin material
Matrix 70 compatible
Extruded to BS EN12608

For the best profile... anywhere
The VEKA Infinity System

The VEKA Infinity System combines the highest levels of technology and style that you would expect from a VEKA window system, coupled with an environmental conscience. Infinity profiles contain up to 80% recycled content, dependent on window style. Extruded to BS EN 12608 extrusion performance standards, Infinity maintains the versatility, cost-reduction classification and heat resistance to provide the performance of virgin profiles, with the social benefits of a recycled product - a must for many projects in low commercial applications and brought to you by the first window system company to establish a PVC-U recycling plant.

The choice of specifiers:
Suite of profiles with the reassurance of the VEKA brand - the most specified profile in the world.

The choice of fabricators:
Fully compatible with the Matrix 70 system – existing manufacturing and component parts can be used.

The choice of installers:
A strong and positive sales message to take to environmentally conscious homeowners, coupled with a kudos good looks.

The choice of homeowners:
A wide choice of window styles plus the knowledge that new windows needn’t cost the earth…

The choice for energy efficiency:
Not only can Infinity achieve A ratings but with appropriate triple glazed units Infinity casement windows can also achieve U values as low as 0.8.

Classic Good Looks
The Infinity System features classic bevelled good looks to suit any style of property and is available in white. The virgin top skin ensures a perfect exterior finish which is 100% quality and colour compatible with the Matrix 70 suite of profiles.

Reycled Specification
The Infinity system is designed in such a way that all recycled material is totally encapsulated within virgin raw material, ensuring the perfect surface finish level at VEKA window systems company.

- All profiles are extruded to BS EN 12608
- Recycled profiles containing up to 80% recycled content.
- Perfect quality and colour match for Matrix 70 systems, allowing full integration of the 2 systems.
- All Infinity recycled profiles are guaranteed for 10 years.
